CNSC decision on the allocation of participant funding for Hydro-Quebec's Gently-2 nuclear facility decommissioning licence application

On November 17, 2015, the Canadian Nuclear Safety Commission (CNSC) announced it was offering up to \$25,000 under its Participant Funding Program (PFP) to assist members of the public, Aboriginal groups, and other stakeholders to review Hydro-Quebec's Gently-2 nuclear facility decommissioning licence application and associated documents, and submit comments to the commission. The deadline for submitting participant funding applications to the CNSC was January 29, 2016.

Background

Participant funding was made available by the CNSC:

- for the provision of new, distinctive and valuable information to the CNSC through informed and topic-specific interventions
- to assist interested parties to review Hydro-Quebec's licence application and submit comments to the Commission.

A funding review committee (FRC), independent of the CNSC, was established to review the funding applications received by the CNSC's PFP administrator, and to make recommendations to the CNSC on the allocation of up to \$25,000 for eligible applicants.

The FRC members were:

- Mr. Guy Riverin, environmental assessment expert and retired federal public servant
- Ms. Heather Jarrett, environmental assessment expert and retired federal public servant
- Mr. Bruce Young, retired Canadian Environmental Assessment Agency Director

The FRC reviewed the five PFP applications received by the CNSC, requesting a total of \$77,547.95.

Eligibility and funding criteria
